Contents Volume 12 (1985/1986)

Vol. 12, No. 1

Guest Editorial
Allassology, the science of change: an applicable integrative engineering discipline
G. King 1
Forging of a metal powder preform ring
A.J. Jha and S. Kumar (Ranchi, India) 13
Control of discontinuous yielding by temper rolling
J.S.H. Lake (Port Kembla, NSW, Australia) 35
Drawing a material consisting of a hard core and a soft sleeve
A.T. Nagy (Budapest, Hungary) 67
Explosive manufacture of bimetallic tubular transition joints
T.Z. Blazynski (Leeds, England) 79
Failure of carbon steels as a result of cold plastic deformation
J. Pośpiech (Gliwice, Poland) 93
Book Reviews 115
Diary of Events 123

Vol. 12, No. 2

The SIMON Project
T. Wanheim (Lyngby, Denmark) 137

Short Communication
Comments on the use of the model-material technique in the hot forging of brass
B. Anulf, D. Lindqvist and C. Lundin (Göteborg, Sweden) 149
Designing pre-forming dies for drop forging by using the model-material technique
K. Myrberg, S. Kivivuori and B. Ahlskog (Espoo, Finland) 153
Simulation of cold-forging folding problems using model materials
J. Harnæs and T. Wanheim (Lyngby, Denmark) 165
The use of the model technique in the prediction of the pressure distribution over the tool surfaces in cold forging
V. Maegaard (Lyngby, Denmark) 173
Model-material experiments applied in the calculation of temperature development during extrusion
T. Svinning, F. Syvertsen (Trondheim-NTH, Norway) and S.A. Brandal (Håvik, Norway) 193
Die design in the extrusion of hollow copper sections using the model-material technique
P. Pihlainen, S. Kivivuori and H. Kleemola (Espoo, Finland) 205
Front and back end crop-losses in slab ingot rolling
U. Ståhlberg and A. Göransson (Stockholm, Sweden) 215
Closing of a central longitudinal pore in hot rolling
A. Wallerö (Stockholm, Sweden) 233
Combined physical and numerical simulation in metalforming
M.P. Schreiber (Lyngby, Denmark) 243

Some observations on plane model studies
B. Anulf (Göteborg, Sweden) 255
Development of friction tests for lubrication in model-material experiments
N. Frederiksen and T. Wanheim (Lyngby, Denmark) 261
Stress-strain relationships of wax-based model materials
S. Finér, S. Kivivuori and H. Kleemola (Espoo, Finland) 269

Vol. 12, No. 3

Effects of alloying upon the hot workability of carbon, microalloyed, tool, and austenitic stainless steels
N.D. Ryan and H.J. McQueen (Montreal, Canada) 279
A study of limiting displacements in the shearing of bars
S. Dzidowski (Wroclaw, Poland) 297
The influence of process parameters on torque and load in ring rolling
J.S. Ryoo, D.Y. Yang (Seoul, Korea) and W. Johnson (W. Lafayette, IN, U.S.A.) 307
Mean pass flow stresses and interpass softening in multistage processing of carbon-, HLSA-, tool- and γ-stainless steels
N.D. Ryan and H.J. McQueen (Montreal, Canada) 323
Tensile deformation behaviour of warm-rolled type 316 austenitic stainless steel
S. Venkadesan, P.V. Sivaprasad, S. Venugopal and V. Seetharaman (Kalpakkam, India) 351
On the application of the positron-annihilation method to dislocation-density evaluation in shock-loaded copper and aluminium
G.S. Popov and N.M. Nancheva (Russe, Bulgaria) 367
Heavy reductions by means of 'non-bite' rolling, including some observations on workpiece shape
U. Ståhlberg and A. Göransson (Stockholm, Sweden) 373
Book Reviews 385
Diary Supplement 391
Acknowledgement of Referees 396
